RISHABH RAWAT

New Delhi, India | +91 8076718123 | rajputrishabh359@gmail.com | https://www.linkedin.com/in/rishabh-rawat-371453228/ | https://github.com/RishabhRawat2003

PROFESSIONAL SUMMARY

Full-stack MERN developer with ~2 years of experience building real-time, event-driven web applications using Node.js, React, MongoDB, RabbitMQ and WebSockets. Built an ERP system handling 10k+ records per module and designed an incremental backup system that cut backup time by ~60%.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, WebSockets, RabbitMQ, JWT
Databases: MongoDB, PostgreSQL, MySQL, Redis
Cloud/DevOps: Docker, AWS (EC2, Lambda, S3), Render, Vercel, Cloudinary

EXPERIENCE

Software Developer | PSQUARE Company | On-site **Aug 2025 – Present**

- Built a scalable ERP system for a construction enterprise managing site, material and employee data, supporting 10k+ records per module with high reliability.
- Implemented real-time UI updates with WebSockets, MongoDB Change Streams and RabbitMQ, eliminating polling and ensuring zero event loss through reliable message delivery.
- Designed an incremental backup and recovery system using a last-record-ID strategy for chunked backups, reducing backup time by ~60% and enabling seamless resume after network failures.
- Developed custom event-handling mechanisms using a frontend local database to resolve complex UI edge cases, improving data consistency and user experience.
- Automated critical workflows with cron jobs and Gmail notifications, reducing manual operations by 40% and ensuring timely, system-driven task execution.
- Engineered role-based socket event filtering that validates table-level update permissions before publishing events to RabbitMQ, so users receive only authorized updates, reducing unnecessary event traffic by ~30%.

Software Developer | TRUWIX | On-site **Nov 2024 – Jul 2025**

- Engineered full-stack web applications with React.js, Node.js, Express.js and MongoDB, improving application performance by 15% through code optimizations.
- Designed and implemented RESTful APIs with Mongoose, reducing database query response time by 20% through indexing and schema optimizations.
- Implemented secure authentication with JWT and Bcrypt and media uploads via Cloudinary in Next.js/Express applications.

Software Developer Intern | Crazy WebDev Technologies | Remote **Jan 2024 – Jun 2024**

- Built responsive frontend components with React.js and Tailwind CSS while working in an agile development team.
- Integrated backend APIs built with Node.js and Express.js into the frontend.
- Optimized MongoDB performance through query indexing and implemented database backups.

EDUCATION

Bachelor of Computer Applications **Aug 2021 – Jul 2024**
MERI College of Engineering & Technology, Bahadurgarh, Haryana
Relevant Coursework: Software Engineering, Operating Systems, Algorithms, Web Development

LANGUAGES

English (Professional working proficiency), Hindi (Native)
